RESEARCH ARTICLES

First Report of *Pennella balaenopterae* Infestation in a Fin Whale
(*Balaenoptera physalus*) Carcass Washed Ashore on the Israeli Coastline

Oren S., Edery, N., Yasur-Landau, D., King, R., Leszkowicz Mazuz, M.,
Eben Bari, S. and Moss, L. 4

The Effect of Melatonin Administration on Colostrum IgG Levels and
Oxidative Stress in Advanced Pregnant Awassi Sheep

Tekin, T.B. and Akkuş T. 9

Investigation of Changes in Biochemical Parameters in Some Diseases
Occurring During the Transition Period in Simmental Cows

Safak, T., Yilmaz, O. and Risvanli, A. 18

Bartonella bovis in Cattle in Nigeria: Molecular Detection and the
Analysis of Risk Factors

Kamani, J., Schaer, J., Nachum-Biala, Y., Baneth, G., Shand, M. and Harrus, S. . . 24

Molecular Characterization of Methicillin- and Multidrug-Resistant
Staphylococcus pseudintermedius Strain Isolated from a
Case of Feline Otitis Externa

Aslantaş, Ö., Olgun, E., Bayirli, M. and Büyükalay, K. 34

Prevalence of Shiga Toxin-Producing O157 and Non-O157 *Escherichia*
coli in Anatolian Buffaloes (*Bubalus bubalis*)

Kalin, R., Mogulkoc, M.N., Karahan, M., Turan, T., Isidan, H. and Berber, E. . . . 39

Abstracts from the 44th Symposium of Veterinary Medicine:

Koret School of Veterinary Medicine.

The Hebrew University of Jerusalem, Israel. 49

Front Cover: **HOPOE** (*Upupa epops*)

HOPOE The bird is brown and yellow in color with black and white wings. Its legs are short with relatively large wings. The bill is narrow and thin. The male and female birds look alike. The Hoopoe has a consolidated tassel feather on its head which it can spread at will. The females nest in holes, spaces and crates, generally close to the ground. To protect her nest, the female secretes a repugnant substance from the Uropygial gland, which smells of decaying meat. The secretion is thought to help deter predators as well as parasites. The Hoopoe is found in Europe, Asia and Africa. In Israel there is a stable population of Hoopoes, mainly in the coastal area but there has been a tendency for the birds to spread inland due to the increase in cultivated fields and lawns. The bird feeds on insect larvae which are extracted from the soil with the aid of its long beak. The Hoopoe call is typically a trisyllabic oop-ooop-ooop, which gives rise to its English and scientific names. The Hoopoe is mentioned in the Bible as being impure (Leviticus: 11) and the G'mara refers to it as the bird that brings dill worms for cutting the Temple stones. The bird is also mentioned in the Koran regarding King Solomon and the queen of Sheba (Sura 27). In medieval times, mystical attributes were ascribed to the Hoopoe. In May 2008, in conjunction with the country's 60th anniversary and following a national survey of 155,000 citizens, the Hoopoe was chosen as the national bird of Israel, outpolling the Eagle, lesser kestrel, barn owl, sunbirds, warblers, bulbul, finch, and the white breasted kingfisher. The Hoopoe was chosen for the cover of this journal in honor of the celebration of the 75th Year of the creation of the State of Israel, on the 14th May 1948.

Mr. **Moshe Tachnai**, generously provided the pictures for the covers.
